

<u>BioCatalin</u>

What?

BioCatalin is an all-natural lotion enriched with specific enzymes that have long been used to assist in the relief of conditions associated with acute inflammation.

Why?

This topical is designed to aid the body in healing tissue that has become inflamed either by physical trauma; intense heat; irritating chemicals; or by infection due to viruses, fungi and bacteria. The central ingredient contained in **BioCatalin** is a powerful enzyme called *Pancreatin Extract*. Enzymes are proteins that trigger activity in the cells of the body to help rebuild injured tissue. This Pancreatin Extract is composed of four proteolytic enzymes with anti-inflammatory properties that have been shown to incite the body's natural enzyme processes without suppressing the immune system. In addition to the Pancreatin Extract, this restorative lotion contains Superoxide Dismutase

(SOD), an antioxidant enzyme; Garlic; Tea Tree Oil and Wood Betony Extract, all of which provide the body with circulation support to aid in the healing process and assist with balancing inflammation in the body.

BioCatalin is a "must have" whenever you need relief from muscle strain, joint conditions, arthritis and general aches and pains.

How?

Apply topically three times daily, or as directed.

Tips:

To further assist in relieving pain, mix a capsule of **InflammaForce** with a teaspoon of **BioCatalin** and apply topically where needed.

Patients and practitioners report that **BioCatalin** can also be helpful for bug bites and bee stings.

Key Ingredients:

Pancreatin Extract, Superoxide Dismutase (antioxidant), Garlic (*Allium sativum*), Tea Tree Oil (*Melaleuca alternifolia*),Wood Betony Extract (*Stachys officinalis*), Sunflower Seed Oil (*Helianthus annuus*)
